PROFESSIONAL SUMMARY

Frontend-focused full-stack developer and Computer Science graduate specializing in React.js, TypeScript, and AI-assisted product systems. Experienced building adaptive learning platforms, realtime analytics dashboards, and offline-first mobile applications. Passionate about product-oriented engineering, responsive UI architecture, and modern startup development workflows.

TECHNICAL SKILLS

Frontend Engineering: React.js, TypeScript, Next.js, Vite, JavaScript, HTML5, CSS3, Tailwind CSS, Responsive UI Design

Backend & APIs: Node.js, Express.js, REST APIs, Firebase, Supabase, MongoDB, MySQL

Mobile Development: Kotlin, Android Studio, SQLite, Material Design

AI & Product Systems: Adaptive Learning Systems, Realtime Analytics Dashboards, OpenAI API Integration, Data Visualization

Tools & Platforms: Git, GitHub, Vercel, Figma, Postman, VS Code

Testing & Debugging: Manual Testing, Functional Testing, Debugging, Technical Documentation

PROJECTS

CEM-PLS-Pro — AI-Assisted Adaptive Learning Platform

2026

React.js, TypeScript, Vite, Firebase, Tailwind CSS, Recharts, OpenAI API

- Architected a psychometric-driven SPA integrating Bayesian Knowledge Tracing and Item Response Theory to deliver adaptive learning pathways and personalized content sequencing.
- Built realtime cognitive diagnostics dashboards using Recharts, visualizing student mastery states, skill profiles, and dynamic difficulty adaptation.
- Integrated OpenAI-compatible chat APIs for AI-assisted learning interactions, deployed serverlessly on Firebase with a Vite-optimized frontend architecture.

NutriMateApp — Offline-First Android Nutrition Tracker

2025

Kotlin, Android Studio, SQLite, Material Design

- Engineered a native Android application for calorie, macronutrient, and meal tracking with a robust SQLite architecture enabling fully offline, fluid interactions.
- Designed a personalized caloric goal system with dynamic macro tracking, interactive routine builder, and responsive Material Design UI.

EXPERIENCE

System Administrator Intern

January 2026 – May 2026

Ximera Business Solutions

- Administered Linux servers, managed user access controls, and supported internal IT infrastructure.
- Wrote Bash scripts to automate system maintenance routines and scheduled backup processes.
- Diagnosed and resolved technical issues across server, network, and desktop environments for onsite and remote users.
- Monitored system health and performance to sustain reliable infrastructure operations.

EDUCATION

Technological Institute of the Philippines - Manila

August 2022 – May 2026

Bachelor of Science in Computer Science

CERTIFICATIONS

- Linux: Introduction to Shell Scripting for DevOps — Coursera
- Linux: I/O Redirection for DevOps — Coursera
- Technical Support Fundamentals — Google
- The Bits and Bytes of Computer Networking — Google
