PROFESSIONAL SUMMARY

Computer Science graduate with hands-on experience building full-stack and mobile applications using React.js, Firebase, Supabase, Java, and REST APIs. Skilled in frontend development, backend API integration, responsive UI design, manual testing, and technical documentation.

TECHNICAL SKILLS

Frontend & UI: React.js, JavaScript, HTML/CSS, Material Design, Responsive UI Design

Backend & APIs: REST APIs, Firebase, Supabase, MySQL, SQL

Programming Languages: Java, Python, PHP

Testing & Debugging: Manual Testing, Functional Testing, Debugging, Technical Documentation

Tools & Platforms: Git, GitHub, Postman, Vercel, Android Studio, VS Code

PROJECTS

PLS-Pro — AI-Assisted Adaptive Learning System

React.js, Firebase, Supabase, Python, REST APIs | 2026

- Built a full-stack adaptive learning platform using React.js, Firebase, and Supabase, integrating REST APIs to deliver personalized learning workflows and real-time content updates.
- Developed data-driven analytics dashboards and adaptive recommendation features with cloud-backed data services and responsive UI components.
- Built and deployed the complete application across frontend, API integration, cloud hosting, manual testing, and technical documentation.

NutriMateApp — Android Nutrition Tracking Application

Java, Android Studio, Room Database, XML Layouts | 2025

- Designed and developed an Android application for calorie, macronutrient, and meal tracking with offline functionality using Room Database for server-side data persistence and SharedPreferences for session handling.
- Implemented camera and gallery-based meal logging with responsive Material Design UI components and structured onboarding workflows.

EXPERIENCE

System Administrator Intern

Ximera Business Solutions | January 2026 – May 2026

- Administered Linux servers, managed user access controls, and supported internal IT infrastructure.
- Wrote Bash scripts to automate system maintenance routines and scheduled backup processes.
- Diagnosed and resolved technical issues across server, network, and desktop environments for onsite and remote users.
- Monitored system health and performance to sustain reliable infrastructure operations.

EDUCATION

Technological Institute of the Philippines – Manila

Bachelor of Science in Computer Science | August 2022 – May 2026
