PROFESSIONAL SUMMARY

Computer Science graduate (TIP Manila, 2026) with practical experience in Linux server administration, Bash automation, server and network configuration, and infrastructure support through a 5-month System Administrator internship. Developed and led a full-stack AI-assisted adaptive learning system integrating psychometric models as Thesis Lead. Targeting DevOps, Cloud Engineering, and Infrastructure roles with solid skills in Linux, technical support, troubleshooting, and software development.

EDUCATION

Technological Institute of the Philippines
Bachelor of Science in Computer Science

Manila, PH
Aug 2022 – May 2026

EXPERIENCE

System Administrator Intern — Ximera Business Solutions

Jan 2026 – May 2026

Linux (Ubuntu/CentOS) · Bash/Shell Scripting · SSH · Active Directory · Server & Network Configuration

- Provisioned and managed Linux servers for 50+ users, handling user access management, permissions, and security compliance.
- Automated backup scheduling, log rotation, and maintenance routines via Bash scripts, reducing manual operational tasks.
- Monitored server health and system performance, maintaining 99%+ uptime and resolving infrastructure incidents promptly.
- Provided onsite and remote technical support, troubleshooting network, server configuration, and desktop support issues.

PROJECTS

PLS-Pro — AI-Assisted Adaptive Learning System (Thesis)

2024 – 2026

Thesis Lead · React.js · Firebase · Supabase · Python · REST APIs · Vercel

- Developed a full-stack adaptive learning system integrating CAT, IRT, CDM, and BKT models for personalized learner assessment and sequencing.
- Built a real-time learner analytics dashboard and adaptive recommendation engine, deployed and hosted via Firebase and Vercel.
- Led a 2-person team across system architecture, REST API integration, testing, and technical documentation through delivery.

NutriMateApp — Android Nutrition Tracking Application

2024 – 2025

Java · Android Studio · Room Database · SharedPreferences · XML Layouts · Material Design

- Developed an Android application for meal logging, calorie and macronutrient computation, and nutrition progress tracking.
- Implemented local data persistence via Room Database and session state management using SharedPreferences.
- Integrated camera and gallery-based meal input with a Material Design UI, onboarding workflow, and business logic.

TECHNICAL SKILLS

Languages: Python, JavaScript, PHP, SQL, Java

Frameworks & Tools: React.js, Firebase, REST APIs, Git/GitHub, Shell Scripting, Android Studio, Vercel, Material Design, VS Code, Postman

Cloud / DevOps / Infrastructure: Linux Administration, Bash Automation, Server Monitoring, Server Configuration, Network Configuration, Network Troubleshooting, Technical Support, Infrastructure Support, Access Management, SSH, Active Directory, CI/CD Fundamentals, Cloud Infrastructure

Databases: MySQL, Firebase Firestore, Supabase, Room Database

OS & Methodologies: Linux (Ubuntu/CentOS), Windows, Agile Development, System Documentation, Testing & Debugging

CERTIFICATIONS

Google/Coursera Certifications

- Linux Shell Scripting for DevOps — Feb 2026
- Linux I/O Redirection for DevOps — Feb 2026
- Technical Support Fundamentals — Feb 2026
- The Bits and Bytes of Computer Networking — May 2026
